Next summer, **Iowa Lakeside Laboratory** (http://www.ag.iastate.edu/centers/lakeside/lakehome.html) will offer duplicate, one-week-long, intensive lab-field courses, entitled “Techniques in Biology Teaching: Animal Biology.” Course goals are to provide biology teacher-leaders from throughout the U.S. (pre-college or college levels) with an array of unique, inspiring, hands-on, and total-immersion workshop experiences involving living invertebrates. Emphasis is on: (1) field collection, ecology, development, behavior, and physiological adaptations of freshwater and terrestrial invertebrates; and (2) new, hands-on investigations utilizing living invertebrates that are easily cultured in the classroom. *For examples of activities and materials, see → [http://www.eeob.iastate.edu/faculty/DrewesC/htdocs/](http://www.eeob.iastate.edu/faculty/DrewesC/htdocs/)*

Admission to the course is on a competitive basis; enrollment is limited to 8 participants per session. Admission requires acceptance by instructor. Selected pre-college biology teachers are eligible to receive full financial support for the workshop, including room, board, daily stipend, and paid tuition (1 graduate credit), through funding from private foundations dedicated to environmental education. *Open slots exist for HS or college biology teachers who have their own funding from schools, colleges, grants, etc.*

**TENTATIVE DATES FOR WORKSHOP COURSES:**

*June 20 through June 25, 2004 (first session)*
*June 27 through July 2, 2004 (second session)*

If you are interested and would like to be considered, please fill out, cut off, and return form below:

**Send form to:** Dr. Charles Drewes, EEOB Dept, Rm 339 Science II, Iowa State University, Ames, IA 50011  
(phone → 515/294-8061) (email → cdrewes@iastate.edu)
